

7-Day Programmable Wireless Thermostat

This Wireless Thermostat and Receiver is used to easily add zoning into any existing home or building without the added labor required to run the extra thermostat wires. When adding zoning to any home or building the toughest part of the job is getting wires to the added zone thermostats. This wireless stat and receiver eliminates this problem. Just mount the thermostat in any room or zone. Mount and wire the receiver to the zoning panel and your zoning system is set. When using multiple stats and receivers just insure to set a different address for each stat and receiver.

Enjoy the convenience of a completely wireless remote control model that is easy to operate with many features; maximum comfort with minimum effort.

Ordering information: **WT** - Wireless Thermostat
WR - Wireless Receiver
WTR - Wireless Thermostat and Receiver Set

Model WT

- Wireless remote control
